

MUHAMMAD ADEEL SHARIFF

Full-Stack Software Engineer

Karachi, Pakistan | adeelshariff26@gmail.com | inquire.adeel@gmail.com | +923363432340 | [Portfolio](#) | [linkedin.com](#) | [behance.net](#)

PROFESSIONAL SUMMARY

Multidisciplinary Software Engineer with experience across full-stack development, mobile applications, UI/UX design, technical project management, ERP systems, and digital marketing. Skilled in managing the complete software development lifecycle, from requirements analysis and high-fidelity prototyping to cross-platform deployment and stakeholder management. Proven track record architecting scalable SaaS solutions and leading technical project roadmaps, combining hands-on engineering with founder-level product ownership.

CORE SKILLS

Modern Languages and Framework: Html, CSS, JS, React, Php, Laravel, Node, Express, Next, Tailwind, Flutter, Wordpress

Databases: MySQL, MongoDB, MSSQL, Firebase

Engineering & Design: RESTful APIs, UI/UX Design (Figma), Canva, Design Systems, ERP Fundamentals

Project & Product Management: Agile (Jira, Trello, Superlist), Stakeholder Discovery, Requirement Analysis, Client Demos, Team Coordination, Technical Project Management, QA & Testing, UI Designer, Product Designer

Digital Marketing: Meta Ads Manager, Campaign Strategy, Audience Targeting, Performance Optimization

AI & Data Science: Predictive Modeling, NLP, Computer Vision, Neural Networks, Autonomous Agents, Pandas, NumPy, Scikit-learn, Power BI, Statistical Analysis

Core Programming Languages: Python, JavaScript, C++, Java, C#, SQLS, OOP, DSA

PROFESSIONAL EXPERIENCE

Full-Stack Developer — The SquadTech Solutions

Mar 2026 – Present

- Full-Stack Development:** Build and maintain scalable web applications, integrating frontend interfaces with secure backend services.
- System Engineering:** Develop and optimize application features, ensuring performance, scalability, and code quality.
- Cross-Functional Collaboration:** Coordinate with designers, developers, and stakeholders to deliver enterprise-grade solutions.
- Solution Delivery:** Contribute to feature planning, testing, deployment, and continuous product enhancements.
- Meta Marketing:** Managed Meta advertising campaigns, audience targeting, and performance optimization for digital growth.

Technical Project Manager & Software Engineer — Neusco

Jan 2025 – Feb 2026

- Technical Leadership:** Led technical discovery sessions and strategic research to define core product requirements and high-priority feature sets for enterprise solutions.
- Full-Stack Engineering:** Architected end-to-end frontend layers integrated with custom service-mapping logic to synchronize UI components with complex backend APIs.
- Mobile Architecture:** Owned 100% of the mobile frontend architecture for cross-platform applications, ensuring fluid user journeys and optimized data persistence.
- UI/UX & Prototyping:** Orchestrated the complete design lifecycle in Figma, translating complex requirements into high-fidelity interactive prototypes and design systems.
- System Optimization:** Implemented predictive financial analytics and data-driven forecasting models to enhance retail ERP operations.

Designer & Developer — TheIntelligenz

Oct 2025 – Jan 2026 (Remote / Project-Based)

- Project Orchestration:** Manage end-to-end project workflows for international clients, coordinating cross-functional design and development teams.
- Product Strategy:** Facilitate remote technical workshops and requirement-gathering sessions to define project scope and user personas.
- Hybrid Development:** Deliver full-stack and mobile solutions for outsourced SaaS products, maintaining design fidelity and data consistency across releases.
- Stakeholder Management:** Conduct live product demonstrations and provide specialized technical support to ensure alignment with business KPIs.

UI/UX Intern — Developers Hub

Aug 2024 – Oct 2024

- Assisted in the full UI/UX design cycle for web and mobile applications.
- Supported design systems and developer handoffs with specifications and prototypes.

Game Developer Intern — The GSS Karachi

Jun 2024 – Jul 2024

- Got hands on practice with Unity Game Engine while working on real projects.
- Gained skills on C# language along with polishing the concepts of OOP.

KEY PROJECTS

Engineering & Technical Product Management

- **SmartMart:** Engineered the complete UI/UX and frontend architecture while managing the full product lifecycle, including database implementation, business rule definition, and stakeholder demos.
- **StLoads:** Delivered end-to-end portal UI/UX and frontend development, incorporating backend logic while leading client discovery sessions and technical project scoping.
- **Air Karachi:** Developed a full-scale web platform and UI/UX samples, managing technical integration with the Intellisys system and leading cross-team coordination.
- **Mentees App:** Spearheaded mobile application development, including high-fidelity UI and core authentication logic, while managing the AI engineering team and client coordination.
- **Guns & Ammunition Inventory Portal:** Architected the full-cycle portal UI/UX and frontend, managing project scope, business requirements, and backend functionality for high-security inventory management.
- **Scripted on Solana:** Led research and development for a Web3 interface while maintaining client demonstrations and iterative feedback loops.
- **Expense Tracker:** Orchestrated the complete UI/UX design cycle, conducting research, business rule definition, and testing for a mobile-first financial platform.
- **Ecovis (Saudi Client):** Managed the end-to-end UI/UX revamp and research for a professional corporate presence, defining business rules and conducting final QA testing.

Core Software Development

- **Chatbot Aisle:** Engineered a multi-tenant SaaS portal for custom AI agent training, focusing on seamless data integration and scalable dashboard architecture.
- **Squad CRM:** Engineered a project management tool for team coordination of tasks and projects with proper role based access system via permissions and enable performance tracking for administration.
- **OptivueAI:** Architected the interface for a computer vision SaaS, implementing real-time industrial compliance and behavioral monitoring systems.
- **NeuCommerce:** Developed a high-performance e-commerce mobile application, focusing on pixel-perfect UI implementation and optimized checkout flows.
- **Stock Expert System:** Built a Python-driven analytical tool utilizing Power BI to transform historical market data into predictive trend visualizations.
- **Signmi Portal:** Developed a multimodal AI platform using NLP to translate text and audio inputs into real-time sign language animations.
- **Visa Today:** Developed a specialized booking engine with automated documentation workflows and real-time application tracking.

EDUCATION

BS Computer Science — Bahria University, Karachi Campus

2022 – 2026 | CGPA: 3.25

HSC (Intermediate) — Commecs College

2021 | Grade: A1

SSC (Matriculation) — White House Grammar School

2019 | Grade: A1
